Re: Inventory of Bank Accounts in the Public Sector

A major objective of the Public Financial Management Reform Programme is the transformation of the Accountant General’s Department (AGD) and the creation of a modernized, efficient and responsive Treasury. In this regard, key treasury management functions, including responsibility the Government of Jamaica’s (GOJ) banking functions, are being transferred from the Ministry of Finance and Planning to the Accountant General’s Department.

In seeking to execute its mandate, the AGD is creating a comprehensive inventory of public sector bank accounts and as such, all ministries, departments, executive agencies (MDAs) and public bodies are required to submit information on the accounts currently being held in commercial banks.

The inventory will cover:

1. Spending accounts in ministries, departments, and executive agencies (fully or partially funded);

2. Revenue accounts for funds generated from fees and charges including Appropriations-in-Aid in ministries, departments and executive agencies (fully or partially funded);

3. Investment accounts in ministries, departments, and executive agencies (fully or partially funded);

4. Subvention accounts of Regional Health Authorities and Public Educational Institutions;

5. Subvention, revenue and investment accounts of on-budget public bodies fully or partially funded from the Consolidated Fund.
