## APRIL 2022

The All Jamaica Consumer Price Index decreased by 0.1 per cent for April 2022. This decline was primarily a result of the 3.1 per cent fall in the index of the 'Housing, Water, Electricity, Gas and Other Fuels' division due to lower electricity rates. The 'Food and Non-Alcoholic Beverages' division however, registered a 0.5 per cent increase in its index, as most classes within the division recorded higher inflation rates. Classes with the strongest impact were: 'Cereals and cereal products' (1.4%), 'Meat and other parts of slaughtered land animals' (1.6%) and 'Fish and Seafood' (3.0%). These increases were due to higher prices for items such as rice, flour, cornmeal, chicken meat, beef stew, and salted fish. The increase in the index for this division however, was moderated by the decreases in the classes, 'Vegetables, tubers, plantains, cooking bananas and pulses' (3.3%) and 'Fruit and nuts' (1.1%). This was due to lower prices for agricultural produce such as Irish potato, plantain, lettuce, cucumber, cabbage, carrot, tomato, melon, and pineapple. Also impacting the overall inflation rate was the 0.9 per cent increase in the index for the 'Transport' division, largely as a result of higher petrol prices.

The 'Housing, Water, Electricity, Gas and Other Fuels' division index rose by 10.7 per cent for the review period, due mainly to a 25.5 per cent advance in the index for 'Electricity, Gas and Other Fuels'. This was due largely to higher rates for electricity.
