APRIL 2023

The All Jamaica Consumer Price Index (CPI) declined by 0.4 per cent for April 2023. This was primarily as a result of the 4.2 per cent fall in the index for the 'Housing, Water, Electricity, Gas and Other Fuels' division. The reduction in the rates

for electricity resulted in a 12.5 per cent fall in the index for the group 'Electricity, Gas and Other Fuels'. The index for the 'Transport' division also fell, moving down by 0.1 per cent. This was mainly due to reduced costs of petrol and air travel.

However, the overall decrease in the CPI was offset by the 0.6 per cent increase in the index for the 'Food and Non-Alcoholic Beverages' division, as prices continued to trend upward for some agricultural produce, namely: sweet potato, yam, lettuce, and tomato.

The point-to-point inflation rate as at April 2023 was 5.8 per cent.

CPI Point-to-Point, April 2023

All Jamaica consumer prices increased by 5.8 per cent for the point-to-point period from April 2022 to April 2023. This is a 0.4 per cent decrease in Jamaica’s point-to-point inflation when compared to the March 2022 - March 2023 period.

The major influences on the point-to-point inflation rate for April 2023 were increases in the index for the divisions ‘**Food and Non-Alcoholic Beverages**’ of 10.3 per cent and ‘**Restaurants and Accommodation Services**,’ of 16.8 per cent. However, moderating these upward movements was a 3.1 per cent decline in the index for the group ‘**Housing, Water, Electricity, Gas and Other Fuels.**’

The increase in the index for the division ‘**Food and Non-Alcoholic Beverages**’ was mainly impacted by the 14.7 per cent rise in the index for the class ‘*Vegetables, tubers, plantains, cooking bananas and pulses.*’ For the review period, the index for the class was impacted by higher prices for crops, such as yam, sweet potato, and cabbage. An 11.1 per cent increase in the index for the class ‘Cereals and cereal products’ and an 8.4 per cent increase in the index for ‘*Meat and other parts of slaughtered land animals*’ also contributed to the upward movement in the index for the division. Higher prices for flour and bread impacted the former class, while higher costs for chicken meat impacted the latter.

An upward movement of 17.0 per cent in the index for the group ‘*Food and Beverage Serving Services*’ was the chief contributor to the advance in the index for the division ‘**Restaurants and Accommodation Services**’. The increase in the group’s index was mainly influenced by higher costs for patties and meals at fast food restaurants and cook shops.

The fall in the index for the division ‘**Housing, Water, Electricity, Gas and Other Fuels**’ was due to a decline of 13.4 per cent in the index for the group ‘*Electricity, Gas and Other Fuels*’. The decrease in the index for this group mainly resulted from lower electricity rates for residential customers.
